Exide Technologies (124838) Final Minor	08/09/2013 05:01 PM

**Item Body**

- **Facility Name:** Exide Technologies
  - **Facility ID:** 124838
  - **Address:** 2700 S Indiana St., Vernon, CA 90058
  - **Permit Stage:** Final
  - **Title V Permit Action:** Minor
  - **Description of changes proposed:** Changing Condition D182.6 to provide a 60-day extension to source test and submit source test reports
  - **Industry:** Secondary lead smelter

**Title V Application:** 554907

**Item Body**

**Due to the urgency of requirements of this proposed plan to be implemented by January 30, 2012, we are requesting Expedited Review and requesting EPA closes its comment period by January 27, 2012.**

**Facility Name:** Exide Technologies

**Facility ID:** 124838

**Address:** 2700 S. Indiana Street, Vernon, CA

**Type of Mod:** Proposed Minor

**Description:**

Section I – Plans and Schedules:

AN 530090 – Compliance Plan for Rule 1420.1 – Emissions Standard For Lead from Large Lead-Acid Battery Recycling Facilities – to implement measures to reduce lead emissions to the atmosphere.

**Attached:**

1. EPA Cover Letter
2. Proposed Title V Permit –Section I
3. SCAQMD Rule 1420.1 Compliance Plan
4. Engineering Evaluation

Please call or email me if there are any problems with the transmission of the attached files

Thank you.

**Item Body**

Hi Leah,

Thank you for the opportunity to review the proposed minor revision to the title V permit for the Exide Technologies facility (Facility ID - 124838). In accordance with South Coast AQMD regulations and 40 CFR 70.8(c), EPA has 45 days from receipt of the proposed permit and all necessary supporting documentation to object in writing to its issuance. We are writing to notify you that although the Agency's 45-day review period will expire on or about September 23, 2013, EPA has performed an expedited review of the proposed permit conditions and has no further comments at this time. The permit is now eligible for issuance.

Please note that although we are terminating our review early, the 60 day period for the public to petition the Administrator to object to the permit begins the day after EPA's 45 day review period would otherwise end. Also note, that if the permit is later found to require corrective steps (including, but not limited to, reopening the permit for cause), the expiration of both EPA's review period and the public petition period without EPA objection does not compromise the Agency's authority to take such measures. Feel free to contact me if you have any questions.

Have a great weekend everyone!

Lisa Beckham  
Environmental Engineer  
Air Permits Office

**Item Body**

Thank you for the opportunity to review the proposed Minor revision for the Exide Technologies project (Facility ID 124838) that would incorporate a compliance plan pursuant to rule 1420.1 which currently is a state-only requirement. In accordance with South Coast AQMD regulations and 40 C.F.R. § 70.8(c), EPA has 45 days from receipt of the proposed permit and all necessary supporting documentation to object, in writing to its issuance. We are writing to notify you that although the Agency's 45-day review period will expire on March 9, 2012, EPA has no comments at this time on the proposed permit; the permit is now eligible for issuance

Also, we understand that rule 1420.1 has been submitted to EPA and is awaiting approval into the California SIP, making it a Federal rule as well. We also understand that when the requirements of this rule are approved into the SIP, the Exide title V permit will be revised to reflect this change, such as labeling the SIP approved rules as federally enforceable.

If you have any questions or concerns, feel free to contact me at (415) 947-4276.

Roberto Gutierrez

**Item Body**

Hello Catherine,

Thank you for the opportunity to review the proposed minor revision to the Title V Permit for Exide Technologies (Facility ID - 124838). In accordance with South Coast AQMD regulations and 40 C.F.R. § 70.8(c), EPA has 45 days from receipt of the proposed permit and all necessary supporting documentation to object in writing to its issuance. We are writing to notify you that although the Agency's 45-day review period will expire on or about May 9, 2013, EPA has performed an expedited review of the proposed permit conditions and has no comments at this time. The permit is now eligible for issuance.

Please note that although we are terminating our review early, the 60 day period for the public to petition the Administrator to object to the permit begins the day after EPA's 45 day review period would otherwise end. Also note, that if the permit is later found to require corrective steps (including, but not limited to, reopening the permit for cause), the expiration of both EPA's review period and the public petition period without EPA objection does not compromise the Agency's authority to take such measures.

Please let me know if you have any questions.

This Email message contained an attachment named  
 image001.jpg  
 which may be a computer program. This attached computer program  
 could  
 contain a computer virus which could cause harm to EPA's  
 computers,  
 network, and data. The attachment has been deleted.

This was done to limit the distribution of computer viruses  
 introduced  
 into the EPA network. EPA is deleting all computer program  
 attachments

sent from the Internet into the agency via Email.

If the message sender is known and the attachment was legitimate, you should contact the sender and request that they rename the file name extension and resend the Email with the renamed attachment. After receiving the revised Email, containing the renamed attachment, you can rename the file extension to its correct name.

For further information, please contact the EPA Call Center at (866) 411-4EPA (4372). The TDD number is (866) 489-4900.
